

Screenshots of my Appointment system

Author: Ayalew Mersha

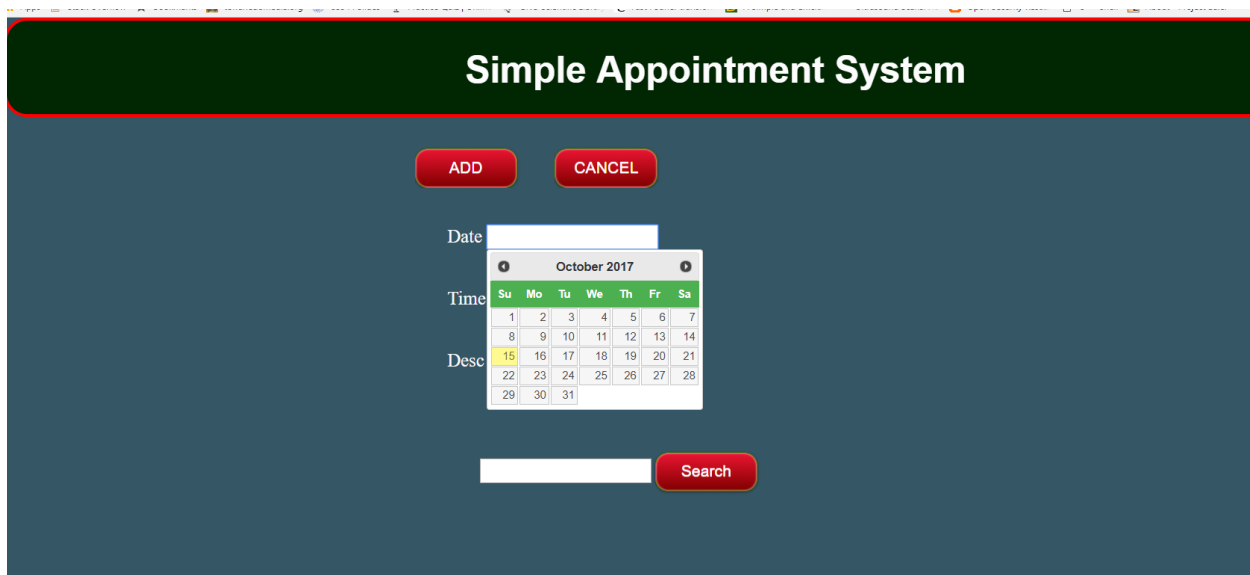

1. This is the first page of the web app.

2. If you press "NEW" in the above window you will get the following window. Ready to insert data. Each field has validation put in place.

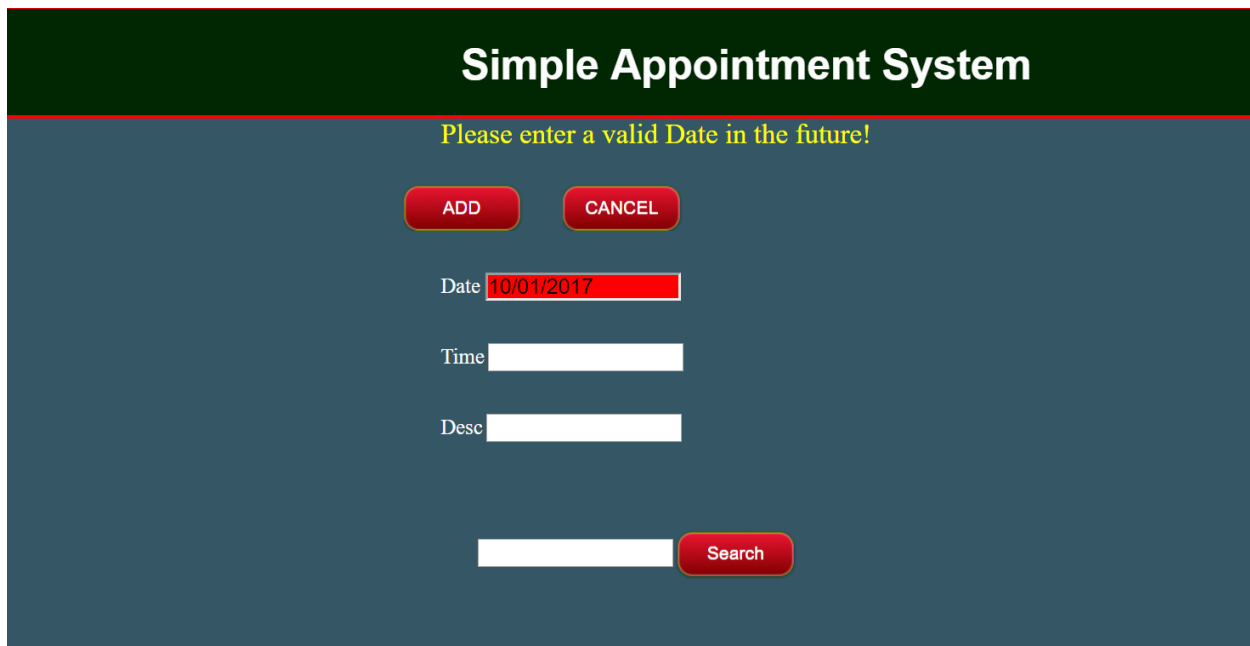

- I have included date picker so that the user pick the date.

The screenshot shows a web application titled "Simple Appointment System". It features a dark green header with the title in white. Below the header, there are two red buttons: "ADD" and "CANCEL". A date picker is open, showing a calendar for October 2017. The date picker has a table with days of the week (Su, Mo, Tu, We, Th, Fr, Sa) and dates (1-31). The date 15 is highlighted in yellow. Below the date picker, there are input fields for "Time" and "Desc". At the bottom, there is a search bar and a red "Search" button.

- The date has to be future date. If not, then we see error.

The screenshot shows the same web application, but with an error message displayed in yellow text: "Please enter a valid Date in the future!". The "Date" input field now contains the text "10/01/2017" and has a red border. The "Time" and "Desc" input fields are empty. The "ADD" and "CANCEL" buttons are still present. At the bottom, there is a search bar and a red "Search" button.

- If everything is correct, then we can submit by clicking on ADD button.
